PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

If NO period for reply is specified above, the maximum statutory period will apply and will expire 6 MONTHS from the mailing date of this communication.

Office Action Summary	Application No. 10/718,831	Applicant(s) SEWITCH ET AL.	
	Examiner Jerome W. Donnelly	Art Unit 3764	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3764

Claims 4-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2 and 3 are rejected under 35 U.S.C. 102(b) as being anticipated by Ross (502984).

Ross discloses a device having tubular components, each having joining ends, a connection means (44) which mates with means 40.

In regard to claim 3, threads 40 are considered as the receiving means and threads 50 are considered as connection means.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 9 and 27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ross in view of Wince (6599222).

Ross discloses the device of claim 9 substantially as claimed absent the device including gripping means.

Art Unit: 3764

The examiner notes that it would have been obvious to one of ordinary skill in the art to provide gripping means on the exterior surface of Ross for the purpose of providing a better grip when using the device of Ross in view of the disclosure of Wince of providing gripping means (28).

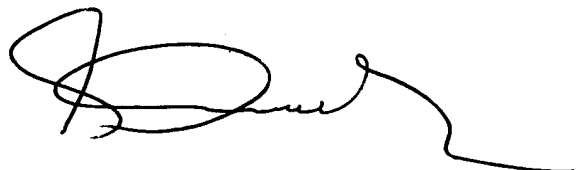

The method of claim (28) is inherent in the disassembly of the device of Ross. The examiner further notes that it is not clear in the applicant's specification as drawings as to how the components of the claims are compressed towards each other. The device as shown in fig. 1A seen to be connected so as to prohibit compression.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Note the overall device of Kropp.
